

True or False Equations Worksheet - Answer Key

1st Grade - true or false and balancing equations | 12 minutes

Write 'true' or 'false' for each equation. For the last problems, write the number that makes the equation true.

Example: $7 = 3 + 4$ is TRUE, because both sides equal 7.

1. True or false: $5 + 3 = 8$

Answer: true

2. True or false: $6 + 2 = 9$

Answer: false

3. True or false: $4 + 4 = 8$

Answer: true

4. True or false: $7 = 3 + 4$

Answer: true

5. True or false: $9 - 2 = 8$

Answer: false

6. Make it true: $5 + \underline{\quad} = 9$

Answer: 4

7. Make it true: $\underline{\quad} + 6 = 10$

Answer: 4

8. Make it true: $8 = 5 + \underline{\quad}$

Answer: 3

Challenge

9. Is $2 + 6 = 5 + 3$ true? Explain.

Answer: True - both sides equal 8.

10. Make it true: $7 + 2 = \underline{\quad} + 4$

Answer: 5 (both sides equal 9)
