

Arrays and Repeated Addition Worksheet - Answer Key

2nd Grade - arrays and repeated addition | 12 minutes

Look at each array. Write the repeated addition sentence and the total.

Example: 3 rows of 4: $4 + 4 + 4 = 12$.

1. Write the repeated addition and total for this array:

Answer: $5 + 5 = 10$

2. Write the repeated addition and total for this array:

Answer: $4 + 4 + 4 = 12$

3. Write the repeated addition and total for this array:

Answer: $3 + 3 + 3 + 3 = 12$

4. Write the repeated addition and total for this array:

Answer: $6 + 6 = 12$

5. Write the repeated addition and total for this array:

Answer: $5 + 5 + 5 = 15$

6. Write the repeated addition and total for this array:

Answer: $4 + 4 + 4 + 4 = 16$

Challenge

7. How many rows of 5 make 20? Write the repeated addition.

Answer: $5 + 5 + 5 + 5 = 20$, so 4 rows

8. Draw an array that shows $3 + 3 + 3$. How many in all?

Answer: An array with 3 rows of 3 (or 3 columns of 3); 9 in all
