

Counting Money (Coins) Worksheet - Answer Key

2nd Grade - counting coins to find a total | 14 minutes

Find the total value of each group of coins. Write the total in cents. (Quarter = 25, Dime = 10, Nickel = 5, Penny = 1.)

Example: 1 dime + 2 nickels + 3 pennies = $10 + 10 + 3 = 23$ cents.

1. 2 dimes and 3 pennies =

Answer: 23 cents

2. 1 quarter and 2 dimes =

Answer: 45 cents

3. 3 nickels and 4 pennies =

Answer: 19 cents

4. 2 quarters =

Answer: 50 cents

5. 1 dime, 1 nickel, and 2 pennies =

Answer: 17 cents

6. 4 dimes =

Answer: 40 cents

7. 1 quarter and 1 nickel =

Answer: 30 cents

8. 3 dimes and 1 nickel =

Answer: 35 cents

Challenge

9. You have 2 quarters. A sticker costs 45 cents. How much change do you get?

Answer: $50 - 45 = 5$ cents

10. Show 30 cents using two different sets of coins.

Answer: Answers will vary, e.g. 1 quarter + 1 nickel, or 3 dimes.
