

Fractions of a Shape Worksheet - Answer Key

3rd Grade - naming fractions from a model | 12 minutes

Write the fraction that is shaded in each bar. Count the total equal parts, then the shaded parts.

Example: A bar in 4 equal parts with 3 shaded shows $\frac{3}{4}$.

1. What fraction is shaded?

Answer: $\frac{1}{2}$

2. What fraction is shaded?

Answer: $\frac{3}{4}$

3. What fraction is shaded?

Answer: $\frac{1}{3}$

4. What fraction is shaded?

Answer: $\frac{2}{4}$

5. What fraction is shaded?

Answer: $\frac{5}{6}$

6. What fraction is shaded?

Answer: $\frac{2}{3}$

7. What fraction is shaded?

Answer: $\frac{3}{8}$

8. What fraction is shaded?

Answer: $\frac{4}{5}$

Challenge

9. A bar shows $\frac{2}{4}$ shaded. What simpler fraction names the same amount?

Answer: $\frac{1}{2}$

10. If 3 of 8 equal parts are shaded, how many parts are NOT shaded?

Answer: 5 parts ($\frac{5}{8}$)
