

# Coordinate Plane: Identify the Coordinates - Answer Key

5th Grade - ordered pairs on the coordinate plane | 14 minutes

---

Write the ordered pair  $(x, y)$  for each labeled point. Count across  $(x)$  first, then up  $(y)$ .

1. What are the coordinates of point A?

**Answer: (2, 3)**

3. What are the coordinates of point C?

**Answer: (8, 2)**

5. What are the coordinates of point E?

**Answer: (7, 9)**

2. What are the coordinates of point B?

**Answer: (5, 7)**

4. What are the coordinates of point D?

**Answer: (4, 5)**

6. Which point has an x-coordinate of 8?

**Answer: Point C**

## Challenge

7. Which point is farthest to the right?

**Answer: Point C (x = 8)**

8. Why is  $(2, 3)$  different from  $(3, 2)$ ?

**Answer: Order matters: (2, 3) is 2 across and 3 up; (3, 2) is 3 across and 2 up.**
